**HOME BUILDING DESIGN STANDARDS
COOPER'S POINT COMMUNITIES
MCINTOSH COUNTY, GEORGIA**

PURPOSE

To assist the Property Owners, their Architects, Designers, and Builders in the design and construction of homes and to assure a neighborhood design that reflects the intent of the Covenants and Restrictions of Cooper's Point Community.

These design standards are to facilitate the review process for property Owners, their Architects, Designers, and Builders. Careful review of the Cooper's Point Covenants must be accomplished before preparations of plans are started. You may obtain a copy of the Cooper's Point Covenants on the website or from the Association's administrator.

DESIGN REVIEW COMMITTEE

The Cooper's Point Design Review Committee (DRC) is the official home construction review committee appointed by the Cooper's Point Board of Directors. This committee has the exclusive jurisdiction in approving or disapproving all of the items listed in Article VI of Cooper's Point Covenants, which can be found in Exhibit #8 of these Standards.

ARCHITECTURAL DESIGN STANDARD

Cooper's Point Community is located in a unique special place known as the "low country" of coastal Georgia. We encourage all new home designs that will reflect the unique low country coastal area architecture that is in harmony with the character of the environment of the area. Low country coast architectural style is distinctive, resulting from the conditions of a hot humid climate, local building materials, local history and cultural patterns. This look can be rustic but gracious. Typical elements of low country homes include large front porches to catch breezes, shade the interior and are inviting to sit on; a raised crawl space to avoid low level flooding and a raised pier construction on homes at nearer the water; high ceilings, allowing for taller doors and windows; and many windows, for the views and ventilation. Rooflines are typically hip or gable, and the main roof may extend over the porches without interruption. Historically, building materials were limited; the dominant construction material was local wood, and later, brick made from local clay, sometimes covered with tabby made of sand and shell. Today modern materials such as cementitious siding (i.e. hardie plank) provide the weather resistant qualities of woods that are no longer available such as cypress or heart pine. Metal roofs are also a typical material used on low country homes.

For home design ideas, you may want to research these suggested websites and search for "low country home plans":

<http://houseplans.southernliving.com>

<http://www.allisonramseyarchitect.com>
<http://www.williampoole.com>

STEPS for DESIGN REVIEW PROCESS

The following outlines the step-by-step procedures for obtaining the appropriate approvals during the various stages of your home construction. These steps should be followed in the sequence listed to ensure a smooth and successful home building experience for the property Owner.

1. Property Owner to provide a copy of the Design Standards to their Builder.
2. Property Owner or Builder to contact the Cooper's Point administrator at cooperspointhoa@gmail.com or 912-832-3891 to schedule a meeting for review of the Application for Preliminary Design Review (APDR)-Exhibit #1.
3. Property Owner and Builder meet with DRC to review the APDR and all supporting materials as outlined. If all APDR requirements are met and the committee is satisfied, a Limited Clearing Permit-Exhibit #2 will be issued by the DRC. If revisions or further work is necessary, another meeting will be scheduled by the DRC.
4. When the Application and Agreement for Design Review (AADR)-Exhibit #3 is completed, with all supporting materials as outlined, a meeting with the property Owner and Builder needs to be scheduled.
5. Property Owner and Builder meet with DRC to review the AADR and all supporting materials. At this meeting the property Owner must submit a building deposit check payable to Cooper's Point HOA for \$5,000. If all AADR requirements are met and the committee is satisfied, a Clearing Permit-Exhibit #4 and a DRC Building Permit-Exhibit #5 will be issued. At conclusion of meeting the DRC, property Owner and Builder will meet at the building site to post the DRC Building Permit and review the property. If revisions or further work is necessary, another meeting will be scheduled by the DRC.
6. Following DRC approval of the AADR, plans and specs need to be submitted to the McIntosh County Building Department to obtain a building permit.
7. Site work and construction begin.
8. Throughout the building process the DRC will inspect the site using the DRC Timeline and Construction Checklist-Exhibit #6 for on site-approvals. If any item on the Checklist is not approved, the DRC will shut down the building site.
9. Sometime during construction and before the Certificate of Occupancy is issued, property must submit a Landscape Plan-Exhibit #7 to the DRC either by mail, email or delivered to the Committee Chairman.

10. DRC meets to review Landscape Plan for review, feedback and approval. If all requirements are met and the committee is satisfied, the approval will be sent to the property Owner. If revisions or further work is necessary, feedback will be sent to the property Owner. Upon receiving revisions from property Owner, another meeting will be scheduled for the DRC to review the updated Landscape Plan.

11. At the conclusion of the building process and after final inspection of the construction and installed landscaping, if the DRC is satisfied that standards are met, it will notify the Cooper's Point Board that it recommends to return the \$4,000 building deposit to the property Owner and the \$2000 deposit to the builder. (Note: \$1,000 of the original \$5,000 deposit is retained for the Cooper's Point HOA Road Repair Fund.)

QUESTIONS

Questions regarding this process can be submitted to the Cooper's Point administrator by email at cooperspointhoa@gmail.com or by phone at 912- 832-3891.

EXPLANATION AND PROCEDURE FOR ALL FORMS

APPLICATION FOR PRELIMINARY DESIGN REVIEW: Exhibit #1

Prior to the preparation of architectural drawings, the property Owner and Builder will schedule a meeting with the DRC to present a preliminary application (APDR) for review. This process will eliminate conceptual errors. The preliminary application is to be submitted with two (2) sets of conceptual plans and may be in sketch form to include site plan, floor plan, front elevation and a copy of the land survey. One set will be retained and one set will be marked approved or disapproved by the DRC. If all APDR requirements are met and the committee is satisfied, a Limited Clearing Permit-Exhibit #2 will be issued by the DRC. If revisions or further work is necessary, another meeting will be scheduled by the DRC.

LIMITED CLEARING PERMIT: Exhibit #2

The Limited Clearing Permit will allow cleanup, mowing, stump removal, and grubbing. The property Owner shall not remove trees larger than 4" in diameter, may not limb-up trees and may not grade or remove earth, except for filling stump excavations, until approved by DRC.

APPLICATION AND AGREEMENT FOR DESIGN REVIEW: Exhibit #3

The Application and Agreement for Design Review (AADR) along with two (2) sets of site plans and all supporting materials outlined on the application will be presented to the DRC at a meeting with property Owner and Builder. A licensed architect who has experience building on coastal properties must stamp all architectural drawings. One set of site plans will be retained and one set will be marked approved or disapproved and will be returned to the

applicant. Redline drawings reviewed by the DRC become the documents of construction. Your DRC approved plans and specs must then be submitted to the McIntosh County Building Department for a building permit.

If all AADR requirements are met and the committee is satisfied, a Clearing Permit-Exhibit #4 and a DRC Building Permit-Exhibit #5 will be issued. At conclusion of meeting, the DRC, property Owner and Builder will meet at the building site to post the DRC Building Permit and review the property. If revisions or further work is necessary, another meeting will be scheduled by the DRC.

Site Plan Standards

- > Drawings shall accurately locate all “improvements” on the lot. These include, but are not limited to house plot plan, driveways, walks, decks, walls, fences, screening, drainage, exterior lighting, etc.
- > Drawings shall include a tree survey and accurately locate all trees. Indicate by marker the trees that will be maintained and those that will need to be removed. See requirement for specimen tree protection.
- > Drawings shall show existing mean sea level elevation referenced to a USGS mean sea level marker, existing and proposed grades as well as finished floor elevation of structure; drawings shall also show existing grades, mean sea level elevation, finished grade, finished first floor, finished second floor, roof height and chimney height.
- > Drawings shall show the limits of clearing, silt fence location, and other required erosion control measures.
- > Drawings shall show all setbacks as delineated in the covenants and restrictions for the lot.
- > Foundation, roof and all other floor plan drawings shall clearly and accurately show and identify dimensions including all walls, windows, doors, etc.
- > Roofs shall have a minimum slope of 6/12.
- > Square footage for Living Area of the first floor and, if included, the second floor must be clearly indicated.
Drawings shall clearly and accurately show and identify all materials, details, and proportional elements.
- > Sections and Details drawn at a sufficient scale (minimum of 1/2"=1'-0" _ to delineate materials and interfaces.

- > Manufacturer name and product name and color must be submitted along with an actual sample of all exterior materials.
- > Owner/builder must have a Limited Clearing Permit issued by the DRC before any clearing or construction can commence. Once approved, the form will be signed and returned with approval.
- > The corners of the structure must be staked as indicted on site map.
- > Driveway and limits of clearing must be ribboned off as indicated on site plan.
- > Silt fence and other required erosion control measures must be installed as indicated on site plan.

Approval of plans by the DRC continues in effect for one (1) year. At the expiration period, the entire review process shall be started over.

The property Owner will submit a building deposit check payable to Cooper's Point HOA for \$5,000 and the builder will submit a deposit of \$2000 also at this meeting if all AADR requirements are met. A Clearing Permit-Exhibit #4 and a DRC Building Permit-Exhibit #5 will then be issued. At conclusion of meeting the DRC, property Owner and Builder will meet at the building site to post the DRC Building Permit and review the property. If revisions or further work is necessary, another meeting will be scheduled by the DRC.

CLEARING PERMIT: Exhibit #4

Prior to issuing the Clearing permit at the AADR meeting, the DRC, property Owner and builder will together determine specifically what trees will be removed or trimmed.

DRC Building Permit: Exhibit #5

At the conclusion of the AADR meeting, if all requirements are met and the committee is satisfied a DRC Building Permit will be issued to the property Owner. This form must be posted at the building site.

DRC Timeline and Construction Checklist: Exhibit #6

Throughout the building process the DRC will inspect the site using the DRC Timeline and Construction Checklist for on site-approvals. If any item on the Checklist is not approved, the DRC will shut down the building site.

Landscape Plan: Exhibit #7

Once construction begins, preferably at least 30 days after the “drying in” stage of construction, the property Owner must submit a Landscape Plan to the DRC either by mail, email or delivery to the committee Chairman. The Landscape Plan is required to include minimum disturbance and “native plant” material indigenous to the area and shall indicate the locations, sizes, numbers and species of all plants, trees, shrubs, and ground covers. The Plan shall be an overlay of the site plan to show all relationships of landscaping and site development work and can be illustrated by either a sketch drawing or computer aided photographic layout showing at least the front and side yards, and back yard if highly visible from the street view. Irrigation systems are strongly recommended due to our local sandy soil condition. If an irrigation system is not installed, the Owner must present a thoughtful design and plan to keep new plantings viable.

GENERAL BUILDING STANDARDS

Construction Rules

Permitted working hours are Monday-Saturday: 7:00 a.m. to 7:00 p.m.; Sunday; only construction cleanup and interior work permitted 10:00 a.m. to 6:00 p.m.

Damage to property and/or roads are the responsibility of the respective property Owner and Builder.

A concrete culvert pipe (with matching ends and no smaller than 12” in diameter) and fill for lot access is to be installed prior to the start of construction to protect road and edges during construction. If a concrete culvert is not installed, measures must be taken by the builder to protect the road edges from damage caused by construction vehicles.

Before digging, you must notify the utility company. Call 1-800-282-7411 relative to utility locations and water system location.

A refuse container and port-a-let must be placed on the back of the construction site and shall be serviced regularly during construction.

During construction the construction site must be kept reasonably clean and safe. The waste dumpster should be emptied regularly so that construction waste materials can be maintained in the dumpster.

Builder shall affect a satisfactory noise abatement program during construction hours.

Builder shall provide temporary dust controls during any construction work that will generate a dust condition. This can be accomplished by spraying water around the construction site during very dry weather.

Builder will erect and maintain temporary wood or metal fencing, minimum 4 foot high, around tree protection zones before starting site clearing. Remove fence when construction is complete. Do not store construction materials, debris, or excavated material within fenced area. Do not permit vehicles, equipment, or foot traffic within fenced area. Maintain fenced area free of weeds and trash. Do not excavate within tree protection zones. Where excavation for new construction is required within tree protection zones, hand clear and excavate to minimize damage to root systems.

The property Owner shall be responsible for electrical service from the Utility Company transformer to point of entry. Electrical service shall be underground. Electric meters shall not be located on front elevations.

For water service see Article XI, Water Service of the Cooper's Point Covenants.

Completion of improvements on a home site is to be per the plans and specifications as submitted and approved by the DRC. During construction, if exterior changes are to be made, it is imperative that the DRC be contacted for review and approval before any changes are made.

At construction completion, the property Owner and his Builder are responsible for removal of all debris from the site, removal of allowed signs, temporary electrical poles, dumpster, excess earth, or any other temporary facility.

Site Design

Review Article VII Use Restrictions of the Covenants in its entirety.

Driveway and walkways can only be constructed of concrete, concrete pavers, asphalt, brick pavers, crushed stone or shells with edging. A 10-foot minimum setback from the side property line is required.

Fuel Tanks- All fuel tanks for home heating should be buried underground if tank is at least 100 gallons or greater.

Mechanical equipment such as AC units must be screened with approved plantings or fencing.

Landscaping

Minimal site disturbance is encouraged.

A landscaping plan is required. All plantings are encouraged to be indigenous to the Southeastern United States and coastal areas. Berry and nut trees are encouraged to help provide forage for wildlife. Irrigation systems are recommended, particularly in the front yard.

Exterior Architectural Style

(also see page 2 : Architectural Design Standard description)

Home designs shall reflect the unique low country and coastal area architecture, and be in harmony with the character and environment of the area. Massing details, materials and proportions shall reflect these characteristics.

Materials: Those typified by the above described architecture.

Foundation: Slab on grade is prohibited. A crawl space is preferred, however, a concrete floor slab with a minimum of 32" exposed foundation finished in tabby, stucco, or brick veneer is acceptable. All crawl space foundations will have a minimum of 12" x 12" piers constructed of brick or concrete masonry unit finished in tabby, stucco, brick veneer. Open space between piers is prohibited.

Exterior Finishes: Horizontal lap siding of wood, cementitious siding, brick, stucco, tabby, cedar shingles. Other similar materials will be considered. Colors will be considered at the time of submission.

Garage Doors: May not be viewable from the front of the house. Garage entry must be on the side or at the rear of the house. Every effort should be made so that garage doors are not located directly facing a street.

Windows: Single hung, double hung, or casement windows of wood or vinyl construction is acceptable. Mill finish aluminum windows are not acceptable. Pre-finished aluminum windows are acceptable.

Attic dormers facing the street shall not show incomplete interior construction.

Shutters: Front elevations are encouraged to incorporate shutters where applicable. Authentic wood construction with shutter dogs is preferred but not required.

Roof: Minimum main roof slope shall be 6 in 12. Dimensional shingles, standing seam painted metal or copper. Vents shall be placed on the rear plane of the roof. Skylights shall be placed on or near the rear plane of the roof.

Chimneys: Must be brick, tabby, or stucco finish.

Other Exterior Features: All exterior details not listed above, i.e. light fixtures, etc., shall conform to the architectural standards.

On-site mailboxes are permitted and must be styled similar to those shown on Exhibit #9 and as stated in Article VII, Section 22.

**APPLICATION and AGREEMENT for DESIGN REVIEW
COOPER'S POINT COMMUNITY, MCINTOSH COUNTY, GA**

AGREEMENT

A Design Review Committee (DRC) has been appointed by the Cooper's Point Board of Directors, as set forth in the Cooper's Point Declaration of Covenants and Restrictions. To document the general policies and positions of the DRC, a set of Design Standards for each phase of development at Cooper's Point has been published by the DRC. The DRC has the sole authority to review plans for all new construction and site improvements, and to comment on, accept or reject each application in a timely manner. This application should be returned to; cooperspointhoa@gmail.com or by mail to Cooper's Point, P O Box 65, Townsend, GA 31331 Formal submission requirements are set forth in the Design Standards. Prior to the preparation of construction drawings, the applicant shall present a preliminary application to the DRC for its comment. The DRC assumes no liability for any structural or code issues and for compliance with applicable government regulations. The purpose of the DRC is to achieve a built community with high aesthetic appeal while protecting the existing natural attributes found in Cooper's Point.

This agreement and application for new construction must be accompanied by a check made payable to Cooper's Point HOA in the amount of \$5,000.00 check which consists of a \$1000.00 non-refundable fee which will be escrowed in our road fund, and a \$4,000.00 refundable deposit. The builder shall also submit payments to Coopers Point HOA in the amount of \$2000 which is refundable. The return of the \$4,000 deposit is contingent upon satisfactory completion of all requirements. All water service fees are the responsibility of the lot Owner with the Water Utility Company.

Upon completion of construction and full compliance with approved plans, all refundable deposits may be returned. DRC compliance deposit monies paid by a party other than the owner are considered as paid by the owner. Refund checks for these amounts will be made payable to the Owner only.

We, the undersigned, do understand accept the terms and procedures set forth in the Cooper's Point Declaration of Covenants and Restrictions, the published Design Standards for Cooper's Point and in the preceding statements relative to the Cooper's Point design review process

Cooper's Point Covenants

ARTICLE VI

Architectural Control

Section 1. General.

(a) Purpose. It is the Declarant's purpose to prohibit any improvement or change in the Existing Property that would be unsafe or hazardous to any personal property or individual; to minimize destruction or diminution of the view afforded to all Lots; to preserve as much as is practicable the visual continuity of the Existing Property; to assure that the improvements and construction of dwellings and structures on the Existing Property will be of good and attractive design, and in harmony with the natural setting of the area, and to serve to preserve and enhance the beauty thereof; and to assure the materials and workmanship for all improvements are of high quality and comparable to other improvements permitted on the Existing Property.

(b) Approval Required. No building, wall, dock, walkway, sign, sign post, driveway, fence, mailbox, screening device, swimming pool, pier, or other structure shall be commenced, erected, altered, modified, or maintained upon any Lot, nor shall any exterior addition to or change or alteration therein be made, nor shall the clearing of any trees or change of property grade be made, until plans and specifications showing the same have been submitted to and approved in writing by the Design Review Committee as to conformity and harmony of external design and general quality with existing standards of the neighborhood and location in relation to surrounding structures and topography as outlined herein. No change shall be made in color, stain or painting of any structure or door thereof, balcony or deck thereunto attached, unless approved.

(c) All dwellings shall be designed by and built in accordance with the plans and specifications of a licensed Architect unless the Association, in its sole discretion, otherwise approves.

Section 2. Architectural Review.

(a) Design Review Committee. The Association, acting through a Design Review Committee (the "DRC"), shall assume jurisdiction over architectural matters. The DRC, when appointed, shall consist of at least four (4), but not more than seven (7), persons who shall serve and may be removed and replaced in the Board's discretion. The members of the DRC shall be Members of the Association, and may, but need not include architects, engineers, or similar professionals.

(b) Fees. The DRC and Board of Directors will establish and charge reasonable fees to be submitted with applications and may require such fees to be paid in full prior to

review of any application, as outlined in the DRC Guidelines. Such fees will include a refundable deposit to be held in escrow until the satisfactory completion of the dwelling and landscape. The DRC in its sole authority will determine the satisfactory completion. In addition to the refundable deposit, a nonrefundable road impact fee will also be collected, which will be deposited in the Association's Road Fund.

Section 3. Design Review Guidelines. The DRC may prepare Design Review Guidelines, in its sole discretion. The Guidelines are intended to provide guidance to Owners and Builders regarding matters of particular concern to the DRC in considering applications. The DRC Guidelines are not the exclusive basis for the DRC's decisions and compliance with the Standards does not guarantee approval of any application.

Any amendments to the DRC Guidelines shall be prospective only and shall not apply to require modifications to or removal of structures previously approved once the approved construction or modification has commenced. There shall be no limitation on the scope of amendments to the DRC Guidelines, and such amendments may remove requirements previously imposed or otherwise make the Guidelines less restrictive.

The DRC shall make the Guidelines available to Owners and Builders who seek to engage in development or construction within the Properties. The DRC Guidelines may be Recorded, in which event the Recorded version, as it may be amended from time to time, shall control in the event of any dispute as to which version of the Guidelines was in effect at any particular time.

Section 4. Procedures

(a) Whenever approval is required for any matter within the jurisdiction of the DRC, the person seeking such approval shall furnish the data required by the DRC, and no such submission shall be deemed to have been made unless and until all required information has been received by the DRC. The DRC shall either approve or disapprove the design, location and proposed construction and clearing activities within a reasonable amount of time after plans and specifications have been submitted to it. If the plans and specifications are disapproved in any respect, the applicant shall be notified wherein such plans and specifications are deficient.

(b) When Approval Deemed Granted. In the event the DRC shall fail to approve or disapprove a proposed design plan and location within forty-five (45) days after all the required plans and specifications therefore have been received by it, approval shall be deemed granted, unless a suit to enjoin the proposed construction has been filed prior to commencement of construction. Plans and specifications required to be submitted shall not be deemed to have been received if they are incomplete, contain erroneous data, or fail to present accurate and complete information upon which the DRC may be expected to base its decision.

(c) Completion of Construction. The approval granted by the DRC for construction activities upon a Lot shall be granted for a time period of one (1) year from the date of the approval. In the event construction does not commence within one (1) year from the approval date, Owner must resubmit plans outlined in Section 4 above. Once construction has commenced for improvements approved by the DRC, all construction activities approved must be completed within one (1) year. No dwelling shall be occupied until the dwelling is fully complete. Any reconstruction or demolition of a dwelling or portion of a dwelling that is damaged by fire or weather-related activities or other acts that create damage must be secured by Owner, and appropriate action taken as to not permit the appearance of such destruction to have a negative impact to surrounding properties. Partial reconstruction shall be completed within **six** (6) months and total reconstruction shall be completed within one (1) year.

(d) Responsibility of Contractor. No contractor will commence any construction within the existing property unless contractor has obtained and read in full the Declaration of Covenants, Conditions and Restrictions for Cooper's Point Subdivision and the DRC Guidelines.

(e) Right To Inspect. The DRC shall have the right, at its election, to enter upon any Lot before or during clearing or construction, erection or installation of improvements or alterations, to inspect the work being undertaken in order to determine specifications, and in a good and workmanlike manner utilizing approved plans and good quality materials, all to be determined in the sole opinion of the DRC. The DRC shall have the power to order the dismantling or cessation of work it deems nonconforming in its sole opinion, and to enforce such order by any legal or equitable proceedings, including but not limited to, a proceeding seeking a temporary restraining order or other injunctive relief.

Section 5. No Waiver of Future Approvals. Each Owner acknowledges that the persons reviewing applications under this Article will change from time to time and that opinions on aesthetic matters, as well as interpretation and application of the DRC Guidelines, may vary accordingly. In addition, each Owner acknowledges that it may not always be possible to identify objectionable features until work is completed, in which case it may be unreasonable to require changes to the improvements involved, but the DRC may refuse to approve similar proposals in the future. Approval of applications or plans, or in connection with any other matter requiring approval, shall not constitute a waiver of the right to withhold approval as to any similar applications, plans, or other matters subsequently or additionally submitted for approval.

Section 6. Variances. The DRC may authorize variances from compliance with any of its guidelines and procedures when circumstances such as topography, natural obstructions, or aesthetic or environmental considerations require, but only in accordance with duly adopted rules and regulations. No variance shall (a) be effective unless in writing; (b) be contrary to this Declaration; or (c) estop the DRC from denying a variance in other circumstances. For purposes of this Section, the inability to obtain approval of any

governmental agency, the issuance of any permit, or the terms of any financing shall not be considered a hardship warranting a variance.

Section 7. Limitation of Liability. The standards and procedures established by this Article are intended as a mechanism for maintaining and enhancing the overall aesthetics of the Properties; they do not create any duty to any Person. Review and approval of any application pursuant to this Article may be based on aesthetic considerations only. The Reviewer shall not bear any responsibility for ensuring the structural integrity or soundness of approved construction or modifications, nor for ensuring compliance with building codes and other governmental requirements, nor for ensuring that all dwellings are of comparable quality, value, or size, of similar design, or aesthetically pleasing or otherwise acceptable to neighboring Owners.

The Association, the Board, any committee, or any member of the Board or any committee shall not be held liable for soil conditions, drainage, or other general site work; any defects in plans revised or approved hereunder; any loss or damage arising out of the action, inaction, integrity, financial condition, or quality of work of any contractor or its subcontractors, employees, or agents, whether or not the Association has approved or featured such contractor as a builder; or any injury, damages, or loss arising out of the manner or quality or other circumstances of approved construction on or modifications to any dwelling.

SUITABLE EXTERIOR STYLES AND DESIGN

Exterior Architectural Designs

Home designs that reflect the unique low country and coastal area architecture, and should be in harmony with the character and environment of the area are preferred.

For home design ideas, you may want to research these suggested websites and search for “low country home plans”:

<http://houseplans.southernliving.com>

<http://www.allisonramseyarchitect.com>

<http://www.moserdesigngroup.com>

<http://www.williampoole.com>

The following suggested renderings are William Poole copyright designs.
